Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Angell et al.

US 5,962,169.

3. The rejection set forth under 35 USC 102 in the paper mailed 10/4/05 is deemed proper and is herein repeated.

Response to Arguments

4. Applicant's arguments filed 1/9/06 have been fully considered but they are not persuasive.

5. Applicants allege that the Angell et al. patent is different from the claimed invention because the ionic liquid is rubbery. This is not persuasive. The patent shows ionic liquids added to rubbers. This anticipates the claim. The fact that the result is a rubbery ionic substance is not relevant. There is no claim limitation which is seen to differentiate these substances.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

8. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kitano et al. US 6,810,225.

9. The rejection set forth under 35 USC 103 in the paper mailed 10/4/05 is deemed proper and is herein repeated.

10. Applicant's arguments filed 1/9/06 have been fully considered but they are not persuasive.

11. The ionic substances identified in the patent are seen to fall within the scope of those claimed. Applicants have not show or alleged that such is not the case. Further the rubbers are seen to fall within the scope of those claimed. Applicants do not point

Art Unit: 1713

out any specific differences between the claimed ingredients and those shown in the prior art.

12. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Angell et al. US 5,962,169 or Takashima et al. US 6,458,883 each taken in view of Michot et al. US 6,841,304 .

13. The rejection set forth under 35 USC 103 in the paper mailed 10/4/05 is deemed proper and is herein repeated.

14. Applicant's arguments filed 1/9/06 have been fully considered but they are not persuasive.

15. The ionic substances identified in the patent are seen to fall within the scope of those claimed. The rubbers are disclosed as well. Applicants do not point out any specific differences between the claimed ingredients and those shown in the prior art.

Conclusion

16. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of
